

BUSINESS SUCCESSION

Our Business Succession attorneys represent a broad scope of privately held companies by delivering comprehensive legal planning that provide clients with carefully customized plans addressing their circumstances, while allowing for timely and smooth transitions upon sale, retirement, disability or death. We proactively take the time to understand each client's individual situation, which better positions us to balance the needs of the various constituents involved and assess issues involving tax consequences, family relationship concerns and efficient administration services. Once we help our clients determine their end goal, we provide counsel on entity selection, business restructuring and management transition. In addition, our attorneys help clients prepare the company culturally and provide counsel for how to broach the topic with the family, management team and organization.

Meyers Roman's Business Succession Group provides a holistic and coordinated approach to the broad spectrum of legal, financial and operational components of succession planning. Because of our unique approach, our attorneys are better positioned to help clients achieve their personal and business goals regarding transfer of ownership and control, as well as resolution to liquidity concerns associated with estate taxes.

Our attorneys take a multi-disciplinary perspective and draw on the expertise of members of related practice areas in order to provide the most efficient and practical solutions. Many of our attorneys have more than 30 years of experience representing clients in a wide range of industries, and several have owned their own companies or served as in-house counsel for closely held businesses and *Fortune 500* companies. In addition, several of our attorneys hold specialized and advanced degrees, such as certification as a specialist in Federal Taxation Law by the Ohio State Bar Association and a MBA. This unique mix of practical business experience and specialized education allows our attorneys to see not just the legal aspect of each case, but also the business and tax implications unique to each client's situation.
